Education

University of Massachusetts Amherst — Amherst, Massachusetts
Bachelor of Science in Computer Science — May 2029
GPA: 3.75
Honors: 2x Dean's List, Commonwealth Honors College

Old Colony Regional Vocational Technical High School — Rochester, Massachusetts
High School Diploma, Specialized in Computer Science. — Graduated June 2025
Developed computer applications used by Cosmetology and Automotive Departments
Honors: Honors Society, Computer Science Excellence Cabinet, SkillsUSA 3rd Place State Website Design Competition.

Experience

Co-Founder / Chief Technology Officer - Nexar Solutions — Oct. 2025 - Aug. 2026

- Co-founded B2B technology service company
- Secured and managed 3 active clients concurrently
- Designed and implemented AI-driven automation pipelines for lead generation and internal operations
- Evaluated and integrated software tools to develop scalable client solutions
- Translated business and client requirements into practical technical solutions

Full Stack Intern - Stanford's LCLS Division of SLAC National Accelerator Laboratory — Stanford. California, June - Aug. 2025

- Designed and developed a production-ready data and inventory management application
- Built front-end interfaces, back-end systems, databases, and CLI integrations
- Developed scalable solutions tailored to scientific and operational requirements
- Collaborated with cross-functional teams to deliver reliable software solutions
- Gained experience developing software for real-world operational and workplace requirements

Projects

Heimdall — Nov 2025 - Present

- Developed a Java neural network initially designed for handwritten digit recognition, later reengineered into a general-purpose architecture for training on varied datasets
- Applied the neural network to other projects including playing chess and stock market pattern recognition
- Implemented and explored neural network algorithms, advanced data structures, and machine learning techniques
- Demonstrated 2.25x performance improvement over ChatGPT-generated machine learning baseline on identical image recognition task

Additional

Programming Languages: Python, Java, Kotlin, HTML/CSS/JavaScript/TypeScript, SQL
Frameworks: PyQt, PyTest, Java Swing, JavaFX, JUnit, Jest
Development: OOP, Data Structures & Algorithms, API integration, Full-Stack Development
AI & Systems: Machine Learning, Neural Networks, Linux, Docker, Git
